# Q3.Hard Disk

## i

$$20000 \times 5000 \times 512 \text{ bytes} = 333.8\text{GB}$$

## ii

All the other disks need to be read and no other disks need to be written.

## iii

The write request of block 12, 23 and 66 can be paralleled.
Write request of block 6 would write P0 on disk 7.
Write request of block 27 would write disk 7.
Write request of block 28 would write disk 0.
Write request of block 50 would write P0 on disk 0.
